About

I help hiring teams find the right people faster, and I use data to check whether the process is actually working.

I am a second-year PGDM student (HR & Business Analytics) at the School of Innovation and Management, Hyderabad. Over the past year I have worked on both sides of HR: recruitment at an IT services company and day-to-day HR operations at a manufacturing firm.

• Sourced and screened candidates for 10+ technology requisitions using Boolean search, Naukri and an ATS
• Coordinated 60+ L1 and L2 interviews and onboarded 12 candidates
• Built an Excel attrition dashboard showing turnover by department and tenure

Looking for: graduate trainee or executive roles in Talent Acquisition, HR Operations or HR Analytics. Based in Hyderabad, open to relocation.

What I learned from screening 400+ resumes in four months:

1. Candidates who customise their headline and summary get shortlisted faster.
2. A clean tracker saves more time than any tool.
3. A quick "Is this still a good time to talk?" message raises interview attendance.
4. Even a simple Excel dashboard shows where candidates drop off.

If you work in talent acquisition, what do you wish students knew before applying?

Ananya joined our recruitment team as an intern and quickly became dependable. She kept the tracker accurate, followed up with candidates without being reminded and handled scheduling for several open requisitions.
