School of Innovation and Management (SoIM)

Post Graduate Diploma in Management (PGDM)

Course Outline | **PGDM (2025-27)** | **Trimester – IV**

Course Code: 404FS	Course Name: Financial Services (FS)	Course Credits: 3.0

Faculty: Dr. Narsimhulu Siddula
Email.ID: narsimhulu.siddula@soim.edu.in

Course Coverage:

This course provides an in-depth understanding of the products, services, business models and managerial practices of financial service organisations. It focuses on retail and corporate financial services, investment banking, securities services, asset and wealth management, insurance, financial services marketing, relationship management and digital financial services. It examines the commercial, operational, technological and strategic dimensions of financial service delivery, enabling students to analyse business opportunities and develop customer-centric solutions in the evolving financial services industry.

Course Objectives:

1. To develop an understanding of the nature, scope, characteristics and business models of various financial services offered by banks, NBFCs, investment banks, insurance companies and other financial service organisations.
2. To familiarise students with the features, applications and delivery mechanisms of retail, corporate, investment banking, insurance, asset management and wealth management services.
3. To develop an understanding of the operational and commercial aspects of financial services, including product development, pricing, distribution, customer acquisition and service delivery.
4. To examine the role of financial services in meeting the financial requirements of individuals, households, businesses and institutional customers.
5. To develop managerial competencies in financial product marketing, customer relationship management, financial advisory and service quality management.
6. To familiarise students with digital financial services, FinTech business models and emerging technology-driven innovations in the financial services industry.
7. To develop the ability to evaluate business opportunities, competitive strategies and emerging trends in financial services.
8. To promote ethical, responsible and customer-centric approaches to the delivery and management of financial services.

Course Learning Outcomes:

After completing the course, student should be able to:

1. Explain and differentiate the business models, products and service offerings of various financial service organisations.
2. Analyse the features, applications and suitability of retail, corporate and investment banking services for different customer requirements.

3. Evaluate various financial products and services offered through asset management, wealth management and insurance organisations.
4. Apply financial services marketing and relationship management concepts to develop appropriate customer acquisition, retention and service strategies.
5. Analyse the operational and commercial aspects of financial services, including product design, pricing, distribution and service delivery.
6. Evaluate the role of digital technologies and FinTech innovations in transforming financial service delivery and business models.
7. Develop strategic recommendations for improving the competitiveness, innovation and customer-centricity of financial service organisations.

Assessment Tools for Learning Outcome:

Students should develop strategic recommendations for improving the competitiveness, innovation and customer-centricity of financial service organisations.	Quiz, Class Participation, Project/Assignments, and Mid & End-term exams

Pedagogy:

The course will be covered across 20 sessions of 90minutes each, totaling 30 hours. The course will conduct through interactive sessions to cover the conceptual aspects and to impart Lectures, Workshops, Group Projects, Flipped Classroom, Role-Playing Scenarios, Quizzes and Reflections.

The course should adopt an experiential, application-oriented and industry-integrated teaching approach. Considering that students have already studied Financial Institutions and Markets, conventional lectures on financial system fundamentals should be minimized. More emphasis should be placed on actual financial products, service delivery, business models, customer interactions and managerial decisions.

Session Plan:

The course will be covered across 20 sessions of 90minutes each, totaling 30 hours. The course contents would be as under:

Session Plan			Pedagogy
