School of Innovation and Management (SoIM)
Post Graduate Diploma in Management (PGDM)

Course Outline **PGDM (2024-26)** **Trimester – IV**

Course Code:	Course Name: Technical analysis - Trading strategies	Course credits: 3

Faculty: Dr.R.Rajkumar
Email.ID: drrrajkumar@soim.edu.in

Course Coverage:

Learn how to apply Technical Analysis as a standalone investment and trading methodology or as addendum to fundamental analysis using tools that are based on price action and other technical principles. Technical analysis is important to understand the theory of investment and trading in markets. This course is focussed on defining and applying momentum indicators to make buy and sell decisions. Understanding and illustrating popular indicators like moving averages, RSI, MACD and stochastics.

Course Objectives:

1. To provide a comprehensive understanding of technical analysis concepts, tools, and charting techniques used in financial markets.
2. To enable students to interpret price charts, patterns, and indicators for forecasting market trends and identifying trading opportunities.
3. To develop analytical skills for constructing and applying trading strategies using moving averages, oscillators, candlestick patterns, and momentum indicators.
4. To help learners understand market psychology, behavioural biases, and sentiment analysis as they relate to price movements.
5. To equip students with the ability to evaluate risk–reward ratios, position sizing, and money management techniques in trading decisions.
6. To familiarize students with algorithmic and quantitative approaches to technical trading, including the use of back testing tools.
7. To build competence in formulating disciplined trading plans that integrate entry, exit, and stop-loss strategies aligned with technical signals.
8. To prepare participants for professional roles in equity research, portfolio management, and trading, and to enhance readiness for certifications such as NISM or NSE technical analysis modules.

Course Learning Outcomes:

After completing the course, students should be able to: *Five points for 1.5 Credit Course and* Ten points for 3 Credit course

Assessment Tools for Learning Outcome:
