Position: Associate Analyst

Location: Hyderabad

Division: GD Explorer

About Us:

GlobalData is a productivity and intelligence platform that empowers leaders to act decisively in a world of complexity and change.

By uniting proprietary data, human expertise, and purpose-built AI into a single, connected platform, we help organizations see what's coming, move faster, and lead with confidence.

Our solutions are used by over 5,000 organizations across the world's largest industries, delivering tailored intelligence that supports strategic planning, innovation, risk management, and sustainable growth.

Data that goes deeper

Proprietary coverage of 95% of global GDP, synthesized in real time from internal and external sources, aligned under a single business taxonomy - giving you earlier insight, unified context, and decisions you can trust.

Experts who turn insight into impact

Human insights that AI alone can't replicate, from industry specialists and strategic advisors, embedded in your workflows to decode complexity and guide high-value action.

AI that moves smarter & faster

AI that doesn't just think, but acts - forecasting market moves, surfacing answers in seconds, and freeing your teams to focus on execution when timing matters most.

Workflow solutions

Together, our six solutions turn intelligence into action, helping every team make smarter, faster decisions. Each solution focuses on the decisions that matter most, driving measurable impact.

Key Responsibilities:

- **Deliver robust market intelligence products:** Contribute extensively to a high-quality stream of market intelligence, focusing on market sizing, segmentation, and forecast modelling. Develop and validate market hypotheses, analyze available datasets, and produce commercially relevant insights. Go beyond surface-level data to offer meaningful conclusions and recommendations for clients.
- **Develop cross-industry expertise:** Develop expertise in a variety of sectors. Track trends in each sector, and build deep insight into business statistics, technology trends, and the competitive landscape for leading markets. Respond in a timely manner to market issues and offer up-to-date opinions.
- **Write reports and tell stories with data:** Create well-structured, concise, and insightful reports for senior decision-makers. Use a data-first approach while ensuring clarity of messaging. Emphasize actionable insights into lengthy documentation, aligning with client needs for brevity and value.
- **Build strategic involvement:** Offer insight in your area of expertise to team planning meetings. In conjunction with your Group Head, contribute to the direction of the team, particularly regarding new data-driven analytical products. Develop a client-centric point of view on ideas for future products and services.

What we are looking for:

- Experience building market sizing models and developing market forecasts using both qualitative and quantitative data sources.
- Ability to write impactful, insight-driven reports based on extensive data analysis and market evaluation.
- Strong research acumen and the capability to distil complex data into simple, clear insights.

- Excellent written and verbal communication skills, with a strong command of business language and logical structuring.
- Analytical mindset with a keen eye for detail and pattern recognition across diverse industries.
- High proficiency in Excel (including advanced functions and data modelling) and Word for effective data analysis and professional report writing.
- Strong organizational skills, including the ability to handle multiple tasks, meet deadlines, and manage time effectively.
- Preferred: one year of post-qualification work experience in market intelligence, consulting, or analytics roles.

Commitment to D&I and EEO:

We believe strongly in the value of diversity and creating supportive, inclusive environments where our colleagues can succeed. As such, GlobalData is proud to be an Equal Opportunity Employer. GlobalData is determined to ensure that no applicant or employee receives less favorable treatment on the grounds of gender, age, disability, religion, belief, sexual orientation, marital status, race, or is disadvantaged by conditions or requirements which cannot be shown to be justifiable.
