PGDM — TRIMESTER I

Exam Subjects & Quick Revision Map | School of Innovation and Management (SoIM) | 2025–2027

Subject List

101 | Marketing Management

Key exam areas: Marketing concepts; marketplace and consumer needs; strategic planning; research; consumer behaviour; B2B; segmentation, targeting and positioning (STP); branding; product, pricing and distribution; integrated marketing communications; advertising and digital marketing; CRM; ethics/CSR; global and services marketing; marketing metrics and ROI.

102 | Organizational Behaviour (OB)

Key exam areas: Foundations and models of OB; personality and attitudes; perception and attribution; motivation theories; goal setting and engagement; group formation and dynamics; teamwork; communication; leadership styles and theories; emotional intelligence; power and politics; conflict and negotiation; organizational structure, culture and change.

103 | Financial Reporting and Analysis (FRA)

Key exam areas: Purpose and framework of financial statements; balance sheet; statement of profit and loss; journal, ledger and trial balance; transaction effects; inventory and long-lived assets; depreciation and amortization; income tax; cash-flow statement; financial ratios and analysis; ROE drivers; equity and credit analysis.

104 | Applied Economics for Business Decisions

Key exam areas: Business economics concepts and economic reasoning; demand and supply; market forces and pricing; consumer/producer decisions; production and costs; market structures; macroeconomic indicators and policy concepts relevant to business decisions. Review the exact class notes and faculty coverage for the detailed examinable list.

How to Revise Efficiently

- **Conceptual subjects:** prepare definitions, frameworks, comparisons, examples, and short case applications.
- **Numerical/practical subjects:** practice problems by hand or in Excel, show steps, and verify calculations.
- **Answer structure:** definition → explanation/framework → example/application → brief conclusion.
- **Final check:** prioritize topics explicitly taught in class, faculty-provided question banks, assignments, and revision sessions.

TRIMESTER I — SUBJECT-WISE REVISION

Continued | 7 core subjects • 3 credits each • 21 credits total

105 | Microsoft Excel for Managers (Certification)

Key exam areas: Workbook and worksheet management; formatting and tables; named ranges; sorting and filtering; formulas and cell references; common functions; importing and cleaning data with text functions; conditional formatting; charts and sparklines; print/page setup; accessibility and compatibility checks; dashboard mini-project.

106 | Business Communication – I

Key exam areas: Foundations and process of communication; communication barriers; non-verbal communication; active and critical listening; note-taking; presentation skills and oral delivery; phonetics/IPA and pronunciation; fluency; skimming and scanning; inference and structure analysis; vocabulary/cloze tests; picture, product and process description; essay writing and business writing.

107 | Quantitative Methods (Data Science) I

Key exam areas: Descriptive statistics; organizing and presenting data; measures of central tendency and dispersion; probability fundamentals and uncertainty in business. Use class notes to confirm the specific formulas, distributions, and numerical methods covered in your section.

Quick Checklist Before the Exam

Subject	Before the exam, make sure you can…
Marketing Management	Explain STP, 4Ps, consumer behaviour, brand positioning, pricing, channels and marketing metrics using examples.
Organizational Behaviour	Compare motivation and leadership theories; apply OB concepts to teamwork, conflict and culture cases.
Financial Reporting & Analysis	Read core financial statements, explain cash flows and calculate/interpret the ratios covered in class.
Applied Economics	Explain core economic concepts and connect them to business decisions; practice any assigned graphs/calculations.
Excel for Managers	Use formulas/functions, sort/filter, clean data, create charts and conditional formatting, and build a clear worksheet/dashboard.
Business Communication I	Structure clear written answers, explain communication barriers, and practice listening/presentation/reading concepts.
Quantitative Methods I	Select and calculate appropriate descriptive statistics and basic probabilities from the methods taught.

Source note: Subject codes and names are based on the SoIM PGDM (BA, FS & General) Trimester I course-outline document for the 2025–27 batch. Topic bullets are a compact revision map, not a replacement for the official syllabus or faculty notes. For Applied Economics and Quantitative Methods, confirm exact topic coverage against your class materials.
